> I'm a front-end developer with experience working for international nonprofits and corporations to design clear and coherent digital platforms through clean code, succint copy, and accessible interfaces.

WORK EXPERIENCE

● Web Designer/Developer

Kasem International — Samutsakhon, Thailand
Aug. 2014 — Present

I developed the new website using WordPress with a minimalist, responsive layout that will be easy to maintain if additional content is needed in the future. I was also in charge of copywriting and content strategy.

● Marketing and Project Management Trainee

Mentor Foundation USA — Washington, DC
Aug. 2013 — May 2014

I redesigned Mentor's website using a custom WordPress theme with a responsive layout and updated modern graphic profile. Additionally, I streamlined the information architecture and wrote clearer, focused copy.

● Digital Marketing Associate

LOVI Asia — Bangkok, Thailand
Aug. 2014 — Present

I make sure the user experience is coherent and consistent across physical and digital platforms. In addition to maintaining the website and e-commerce portals, I design product packaging and showcase spaces for exihibitions.

● Freelance Web Developer

Helping Enrich DC — Washington, DC
Sep. — Oct. 2013

Working with the executive director, I customized a WordPress theme to develop a new website and digital idenity. I designed an interactive infographic to raise awareness about illiteracy in DC as well as showcase the organization's programs.
